

CONSERVATION REPORT-JULY 2021

WEEDS ALONG THE ROAD

The County will fine EMHOA if weeds are along the road. People are walking their acres and pulling them out.

DEFINITION OF MEGA DROUGHT - more than 2 decades of drought conditions

TREES

MCH packets were bought for the Douglas Fir Beetles by residents. Too many trees are dying. Take a look on CR5 going up to the 5-6 mile marker and you see groves of dead trees. Also on CR5A -which is very close to Elk Meadows-there's large groves of dead trees.

ASPEN SUDDEN DECLINE DISEASE-Deer love to eat aspens so if you place a wire mesh fence around it, the deer can't get to it.

If it's been really dry for over 3 weeks, water it well. Below is picture of 3 year old aspen grove that's been fenced in to protect from being eaten by deer.

Respectfully submitted,

Diane Thompson
